

- Create A Repository on github named advent-of-code-2024
- Create an README.md file with the following content

This repository contains my solutions for [Advent of Code 2024] (<https://adventofcode.com/2024>) implemented in C#. Each day's challenge is solved using C#, showcasing problem-solving and coding skills.

Structure

- Each day's solution is located in a separate folder.
- Solutions include well-commented code for better understanding.

How to Run

1. Clone this repository.
2. Open the project in your preferred C# IDE (e.g., Visual Studio or Rider).
3. Run the desired solution file.

- Clone the Repo to your local hard disk
- Work on the 2 pdfs and upload the samples to your repo
 1. arrays.pdf
 2. reading-files.pdf
- After you've finished that work out the first sample of [Advent of Code](#)
